FALL/WINTER 2026

World Centric Staff Retreat, Fall 2025

Get to Know World Centric

World Centric was founded in 2004, not to sell products, but as a response to the Iraq War. The belief was simple: when people better understand the world around them, they make different choices.

We started as a nonprofit, creating documentaries, educational courses, and resources about global inequality and environmental challenges. Our shift to compostable foodservice products wasn't a departure from that mission. It was a way to support it for the long term. While nonprofits rely on donations, a mission-driven business can generate the resources to invest in frontline organizations year after year. The products became the engine that helps power the impact.

How the Model Works

We make compostable foodservice products that help replace conventional plastic. Every cup, bowl, and container is designed to reduce waste while helping build a better world. Our products also make our impact possible. Each year, we donate at least 25% of profits to more than 60 frontline organizations working on reducing poverty, restoring ecosystems and advancing food security, water access, community resilience, and human rights. **Since 2009, we've donated more than \$23 million.**

What This Means for Customers

When you purchase from World Centric, the transaction does two things: it puts a certified compostable product into your operation, and it moves funding to frontline organizations working on some of the world's most pressing problems. That is not a giving program layered onto a business. It is the architecture of the business — built that way from the start.

The Proof

- **Founded 2004 as a nonprofit.** The mission has not changed over 22 years.
- **Transitioned to For-Profit in 2009.** Business funds the mission.
- **B Corp certified since 2010.** Third-party verified and recertified 7x.
- **Benefit Corporation since 2013.** Doing good as a legal obligation, not an aspiration.
- **Minimum of 25% of profits** committed annually. \$23M+ cumulative giving to frontline organizations.
- **30,000 tons** of petroleum based products replaced every year.

Where the Giving Goes

Roughly 838 million people live on less than \$3 a day (the current World Bank threshold for extreme poverty) without reliable access to food, clean water, sanitation, education, or healthcare. Climate change is deepening this gap. World Centric's giving is directed at both fronts: poverty reduction and environmental resilience, with smaller programs supporting composting infrastructure, food access, and food waste reduction.

Giving details to date since the inception of our program in 2009:

\$23M+

Total Giving Since 2009

Impact Grants, Regional and Carbon Giving, Staff Giving, Employee Donation Matching and Product Donations

338+

Programs & Projects Funded

Spanning the globe, directed toward the areas of greatest need

Through our giving, we aim not only to provide assistance but to help drive systemic change at the root of these issues. To learn more, see pages 42-43 for a feature on our impact partner ALIADOS or visit our website worldcentric.com/giving.

Sustainable Business Certifications & Memberships

Public Benefit Corp Since 2013

As a Benefit Corporation, we focus on how our business affects society and the environment. We aim to create a positive, measurable impact for employees, vendors, and the wider community.

Certified B Corp Since 2010

As a certified B Corporation with a score of 126.2, World Centric demonstrates a strong commitment to social and environmental performance, accountability, and transparency.

1% For The Planet

One Percent for the Planet is an international organization whose members contribute at least one percent of their annual revenue to environmental causes to protect the environment.

National Minority Development Council

The NMSDC advocates and serves as a growth engine to create a more inclusive and equitable business landscape for minority owned businesses.

See page 47 for our product certifications.

Navigating Compostable Industry Regulations

US Composting Council®

World Centric is committed to advancing the circular economy and establishing ourselves as thought leaders in the compostable products sector. Through our active membership in the US Composting Council and other industry organizations, we maintain a dedicated team of subject matter experts ready to support our customers' environmental goals.

**Our Team
Can Help:**

**Recommend
Products**

**Navigate
Compliance**

**Advocate for
Compostables**

Recommendations Our team provides comprehensive guidance on sustainable decision-making, composting infrastructure, waste reduction and diversion programs, and evolving local and federal legislation.

Compliance We help customers navigate compliance requirements, advocate for the acceptance of compostable products with composting operators, and deliver data-driven recommendations for optimal end-of-life solutions and beginning-of-life choices.

Advocacy Our Government Affairs and Policy expertise makes complex packaging regulations accessible and actionable for implementation. Connecting operators with the right resources to design and execute successful waste diversion programs ensures that your actions can help reduce the impact of our consumption on the environment and help create a better world.

For expert guidance on your sustainability initiatives, contact us at zerowaste@worldcentric.com.

Table of Contents

Color Key

Grocery Perimeter Feature

World Centric helps grocers with packaging designed specifically for fresh perimeter departments.

Grocery Perimeter Solutions.....6-7

Cutlery: Paper/Bamboo/Fiber

Our cutlery is made from sustainable materials and is the perfect replacement for traditional plastic cutlery.

Paper, Bamboo and Fiber Cutlery8-9

Heat Resistant TPLA Products

Our TPLA cutlery and reusable tableware is made from crystallized PLA with a mineral filler.

TPLA Cutlery & Napkins..... 10-11

Cutlery Dispenser and ZeroWare®12-13

Molded Fiber Products

Our fiber products are made from unbleached plant fiber like sugarcane, bamboo and wheat straw.

Plates & Clamshells..... 14-15

Takeout Containers & Lids 16-19

Bowls & Lids..... 20-21

Catering Pans and Pizza Containers 22-23

Foodservice Trays.....24-25

Portion Cups, Small Bowls & Lids26-27

FSC® Paper Products

Our paper products are made from FSC® certified paper from responsibly managed forests.

Boat Trays & Paper Containers.....28-29

Paper Bowls, Cups, Lids & Accessories... 30-35

Clear PLA Products

Our PLA products are made from bioplastic, derived from renewable plant sugars.

Cups, Lids & Straws 36-37

Parfait, Delis, Bowls & Green Bags 38-39

Custom Printing Capabilities

Highlight your sustainability efforts with branded packaging from World Centric.

Custom Printing 40-41

Impact Project Feature

ALIADOS is helping farmers build thriving businesses while helping to protect biodiversity.

ALIADOS.....42-43

Zero Waste Success Story

Spotlight on companies and events making a difference by diverting waste from landfills.

Gratefull + NewTerra Compost 44-45

Custom Packaging & Design

Stand out with innovative, compostable packaging solutions that enhance your sustainability credentials.

Custom Packaging.....46

Product Certifications

Our products are third-party tested to ensure they comply with ASTM standards for compostability.

Composting & Specifications.....47-48

Oil Resistance with no added PFAS

World Centric products listed in this catalog contain no added PFAS and are made with alternative grease resistance solutions. The fiber products with no added PFAS are denoted by SKU endings as follows:

SKU Ending	Oil Resistance Details
-LF:	Product does not have any oil resistance, e.g. fiber lids that do not need oil resistance
-L-LF:	Oil resistance is provided by PLA lamination
-LFP:	Leaf Plus® World Centric's patented plant-based compostable solution for high temperature grease and oil resistance with no added PFAS*
-LFS:	Industry compostable solution for grease and oil resistance with no added PFAS

*For a list of all patented products and solutions, visit worldcentric.com/patents.

Sustainable Packaging for the Grocery Perimeter

Today's grocery perimeter continues to grow as shoppers seek fresh, convenient meal solutions for home consumption. Retailers are expanding offerings across deli, prepared foods, soup and salad bars, meal kits, and grab-and-go programs while consumers increasingly prefer packaging that aligns with their sustainability values.

World Centric helps grocers meet both needs with packaging designed specifically for fresh perimeter departments. Our containers, bowls and trays deliver the performance needed for hot and cold foods while providing a more sustainable alternative to conventional plastics. Made from renewable plant-based materials, our products are home or industrially compostable where facilities exist.

Why Choose World Centric Products?

Made from Renewable Plant-Based Materials
No added PFAS and designed with sustainability in mind.

Reduces Reliance on Petroleum-Based Plastics
A better packaging choice for retailers and consumers alike.

Verified Compostable
Helping support your sustainability initiatives and waste reduction goals.

Grocery Perimeter Solutions

Freshly Prepared Foods

World Centric's fiber and PLA containers showcase fresh prepared foods while providing durability for transport and takeaway. Designed for hot or cold applications, some containers feature clear lids for enhanced visibility and presentation, helping create an attractive customer experience.

PAPER, BAMBOO & FIBER CUTLERY

World Centric's cutlery gives foodservice operators more thoughtful options for serving customers on the go. Made from renewable bamboo or plant fibers instead of conventional plastic, it helps reduce reliance on fossil fuels while cutting back on plastic waste.

FO-NT-6

Paper, Bamboo, Fiber Cutlery

Our durable, compostable paper, bamboo and fiber cutlery is a perfect sustainable swap for petroleum plastic. Our paper cutlery has a heat resistant coating for smooth, easy use—a sustainable and functional alternative that is certified compostable in home and industrial facilities.

PLA CUPS, LIDS, SALAD BOWLS AND CLEAR CONTAINERS

PLA (polylactic acid) begins with plant sugars that are fermented into lactic acid before being converted into a durable polymer. Compared with conventional petroleum-based plastics, manufacturing PLA generates 75% fewer greenhouse gas emissions and uses 50% less non-renewable energy.

CUSTOM PRINTING

Highlight your sustainability efforts with branded packaging from World Centric. We have a full range of products that are perfectly suited for a variety of foodservice needs and can be customized with your logo, official colors and other brand assets.

Custom Printing Capabilities

Stand out from your competitors and make a stand for sustainability by imprinting your logo on compostable paper cups, bowls, containers, straws, sleeves and select fiber items. Please contact your sales representative or email sales@worldcentric.com for product availability, pricing, MOQ's and lead times, which vary by item.

Custom Printing Process and Timeline

1 Obtain Template

Your Sales Representative or Account Manager will supply the template needed for your project.

2 Email Artwork

Email print-ready art using our templates to customprints@worldcentric.com. We will check your art for any issues/errors and forward to our suppliers for proofing.

3 Approve Proof

A digital proof is provided by our supplier. It is the customer's responsibility to check design and colors and sign their approval.

4 Await Delivery

Once proof is approved, printing will take place. Expect a 12-20 week turnaround for most items.

Reach out to your Sales Representative or Account Manager for more information or email sales@worldcentric.com.

FEATURED IMPACT PROJECT

Photos by Janae Lloyd

World Centric directs at least 25% of profits every year to frontline grassroots organizations working on poverty, environmental justice, and human rights. Our products exist to fund this work. Since 2009, we have donated over \$23 million dollars. Funding work that integrates climate solutions with socioeconomic development is a powerful way to impact both people and the planet. Your purchases make this giving possible. Learn more at worldcentric.com/giving.

ALIADOS

PARTNER SINCE: 2022
FUNDING TO DATE: \$580,366

Growing Food, Protecting Forests

Between 1985 and 2023, more than 88 million hectares of Amazon forest were destroyed, driven by mining, agriculture, and cattle ranching. This raises an urgent question: how can agriculture support the global food system without degrading the ecosystems that sustain it?

In Ecuador's Amazon, ALIADOS is working in partnership with Indigenous and smallholder farmers to answer that question, transforming agriculture from a driver of deforestation into a tool for protecting it. Through regenerative farming practices rooted in traditional knowledge and healthy soil, ALIADOS is helping farming families build thriving businesses while conserving the world's most biodiverse landscapes.

The results speak for themselves: farming families supported by ALIADOS have seen a 96% average increase in income, while over 1,200 families are now applying regenerative agriculture practices across more than 4,500 hectares of conserved land.

The World Centric team visited Ally Guayusa Cooperative, an ALIADOS business member, on an Impact Trip to Ecuador in Spring 2026.

The four strategic priorities in the ALIADOS model include:

Regenerative Agriculture

Indigenous and smallholder farmers receive training, inputs, and microgrants from ALIADOS to transition to regenerative farming practices rooted in traditional knowledge and healthy soil, improving farm profitability, food security, and ecological health.

Bioeconomy Incubation

With training and financing from ALIADOS, rural entrepreneurs build viable businesses within agricultural value chains, turning local knowledge into lasting economic opportunity for their communities.

Responsible Markets

ALIADOS connects local producers with regional and global customers committed to transformational change, securing stable and fair market access for regenerative agriculture and bioeconomy enterprises.

Creating Ecological Value

By measuring the ecological value generated by regenerative farming, from carbon sequestration to biodiversity conservation, ALIADOS helps farmers and businesses turn healthy ecosystems into a competitive advantage.

Inviting Everyone to the Table: Gratefull + NewTerra Compost

Sharing a Table

Imagine a giant table stretching through the heart of downtown Chattanooga, where everyone is welcome to gather for a free Thanksgiving meal served hot and ready to enjoy. Gratefull is exactly that—a city-wide community Thanksgiving celebration centered around one long table on a public street, where neighbors become friends and gratitude is shared one meal at a time.

Originally launched in 2014 as One Table, the event was created by a group of Chattanooga entrepreneurs who believed that a thriving city should reflect all of its residents—and that everyone deserves a seat at the table. With no cost to attend, no expectations, and no agenda beyond sharing a meal together, the inaugural event welcomed more than 700 guests to what was intended to be a one-time gathering. Instead, Chattanooga embraced the idea.

Over the years, the event has grown into one of the city's most meaningful Thanksgiving traditions, welcoming approximately 2,200 attendees annually. Today, Gratefull is made possible through the generosity of countless volunteers, local businesses, nonprofit organizations, and community partners who come together to prepare, serve, and share a Thanksgiving meal with friends, neighbors, and first-time visitors alike.

In 2021, River City Company assumed the lead role in event management and coordination, working alongside

The Gratefull Thanksgiving dinner is a free city-wide potluck that takes place at one long table in Chattanooga, TN.

longtime community partners to reimagine and expand the event into the vibrant celebration it is today. Together, these organizations continue to steward Gratefull's original mission while growing its reach, strengthening partnerships, and creating opportunities for even more neighbors to connect.

At its heart, Gratefull remains beautifully simple: one table, one meal, and one community gathering in gratitude. Learn more and check out the replication guide at gratefullcha.org.

"Gratefull is an event all about caring – caring for one another as a community by dining and socializing along one long table. Utilizing World Centric products makes it easy to compost a significant amount of the waste created by the event." - Dawn Hjelseth, VP of Marketing and Communications, River City Company

Gratefull relies on volunteers and donations to put on their yearly event.

World Centric**

150 Volunteers

2300 Meals Served

NewTerra Compost Company

NewTerra Compost provides homes, businesses and events a better solution for disposal of food residuals and compostables. Their mission is to keep organic material out of landfills which not only reduces greenhouse gas emissions, but also generates compost that builds healthier soil.

As a yearly partner for the Gratefull event, NewTerra Compost provides compost cans at the event that collect food waste alongside World Centric compostable products. They also handle mixed recycling and set up waste stations with volunteers to help sort the materials. Learn more at newterracompost.com

Elevate Your Brand with Custom Packaging

Stand out with our innovative, compostable packaging solutions that enhance your brand's sustainability credentials. Our expert team creates tailored consumer packaged goods solutions by merging plant-based materials with exceptional product design, engineering, and manufacturing processes throughout your product's life cycle.

Customer Innovations

Partnering with creative and operations teams, we help you realize your brand vision, from concepts and visuals to prototyping and manufacturing. Below are a few examples of collaborations and innovations in the takeout sector.

Takeout Salad Packaging

A large burger chain needed a sustainable salad container for their growing market. World Centric designed a tray and lid combination with a unique slot to hold salad dressing in an existing portion cup, all made with sustainable plant fiber.

Fiber Scoop

A powdered supplement company wanted to replace their plastic scoop with a more sustainable option. We developed a fiber scoop sized to their serving needs that fits neatly into their packaging and World Centric won an Innovation award from the OSC Packaging Collaborative.

World Centric Innovations

World Centric is developing new products to support growing grab-and-go and heat-and-eat programs with packaging designed for convenience and performance. These new product concepts are ideal for showcasing freshly prepared foods while providing durability for transport and takeaway.

Sandwich Wedge

This sandwich wedge* concept is perfect for grocery stores and convenience markets that sell pre-made foods to go. With more customers demanding on-the-go options,

these containers help support sustainability in a growing sector of the foodservice market.

Pizza Slice

This fiber pizza slice concept is perfect for single serving slices at pizzerias and cafeterias. Customers will be impressed with how well the fiber holds up utilizing World Centric's Leaf Plus® patented grease resistance.

**Note: Design patents pending.*

From Concept to Nationwide Delivery

Transform your brand with our tailored packaging solutions. From secure lid fits and stacking features to full graphic sleeves for unique, compostable cartons and outer wraps, we bring your vision to life.

Partner With Us

Trust us to strengthen your brand's sustainability story and make a standout impression in the market. Our solutions are plant-based, bleach-free, dye-free, and gluten-free, ensuring both environmental responsibility and product integrity. See worldcentric.com/design for more information or reach out to sales@worldcentric.com.

Sustainable Product Certifications

World Centric is proud to partner with NSF International, a global leader in product certification, to verify the compostability of our products. NSF is a global not-for-profit public health and safety organization that provides trusted third-party verification, ensuring that compostable products meet stringent standards and comply with evolving regulations. Learn more at [nsf.org](https://www.nsf.org).

Our products undergo testing to ensure they contain no added PFAS and meet ASTM standards for compostability, enabling them to earn and maintain the following certifications. For more details about our certifications, see our website worldcentric.com/certifications.

Product Specifications and Composting Rates

The information below is meant to be a general guide. We recommend testing in your establishment for accurate information for your specific needs, as conditions can vary. Contact your Sales Manager to request samples.

Hot/Cold Compatible 	Product Category	Heat Resistance	Shelf Life	Time to Compost*
	Plant Fiber Containers and Cutlery	Suitable for foods up to 450° F; Oven and microwave safe for short periods. Testing recommended	5 years	2-3 months
	Paper Hot Cups, Bowls & Lids	Suitable for food and drinks up to 220° F; Not microwavable	2 years	2-3 months
	NoTree® Paper Food Containers and Cutlery	Suitable for food up to 220° F; Containers are heat lamp and warming oven safe. Not microwavable. Testing recommended	2 years	2-3 months
	TPLA Cutlery	Suitable for foods up to 200° F; Dishwasher safe	3 years	2-4 months
	ZeroWare®	Suitable for foods up to 200° F; Dishwasher safe. Not microwavable	3 years	N/A

Cold Compatible 	Product Category	Heat Resistance	Shelf Life	Time to Compost*
	Paper Cold Cups	Suitable for cold and warm food and drinks only	2 years	2-3 months
	PLA Cups & Containers	Suitable for cold food and drinks only	2 years	2-4 months
	PLA Tasting Spoons	Suitable for cold and warm foods up to 120° F	3 years	2-4 months
	Green Bags	Suitable for cold items only	12 months	2-3 months

*Composting estimates are based on an industrial composting facility and may vary depending on equipment and conditions. All compostable products are certified to fully compost in an industrial composting facility within 6 months.

RESPONSIBLE FROM START TO FINISH

Molded Fiber Containers & Cutlery

- Made from unbleached bamboo, sugarcane bagasse and wheat straw with no added PFAS
- Compostable lining (where indicated)
- Gluten free
- Conform to FDA guidelines for food use

PLA and TPLA Cutlery & ZeroWare®

- PLA Cutlery made from bioplastic
- TPLA Cutlery/ZeroWare made from crystallized PLA with a mineral filler
- Conform to FDA guidelines for food use

Paper Cups, Bowls, Containers & Cutlery

- NoTree® cups, bowls, containers made from FSC® certified bamboo paper
- White cups and bowls made from FSC® certified 30% post-consumer fiber
- Cups, bowls and containers have a compostable lining to prevent leaks
- NoTree cutlery made from FSC® certified bamboo paper with a heat-tolerant coating
- Conform to FDA guidelines for food use
- Not microwavable

Cold Cups, Deli Containers & Lids

- Made from bioplastic derived from plant sugars
- Conform to FDA guidelines for food use

Food Scraps and Kitchen Liners

- Made from synthetic plastics and corn starch
- Certified OK Compost Home by TÜV AUSTRIA
